

# Delta-T Alert Software

A Simple Device with Staggering Results

## Cut The Cord

The Delta T Alert™ Sensor wireless systems constantly monitor every critical electrical enclosure in a facility and complements existing electrical maintenance programs.

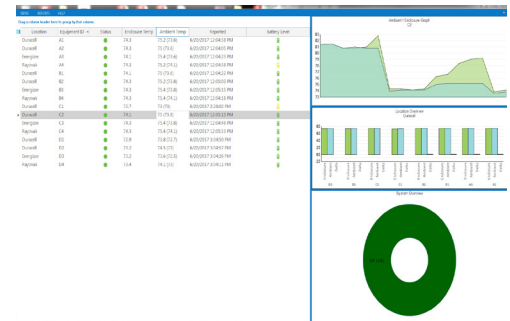

## Reduce Your Risks

The system warnings from the Delta T Alert™ allow maintenance technicians to be warned of potential issues causing elevated internal ambient temperatures.

## Keep A 24/7 Watch

The Delta-T Alert™ wireless systems constantly monitor every critical electrical enclosure in a facility and complements existing electrical maintenance programs.

The Delta-T Alert™ sensors and controllers come pre-loaded with the necessary software. Additionally, the controllers are also shipped with a copy of the license-free dashboard software that is easily installed on your local computer (or server). Once the dashboard software is installed and the sensors are turned on, you can easily configure and program them to your desired specifications from your dashboard. The system keeps track of all your data reported and makes this data available in easy to use reporting software. You can compare the temperature data from similar devices, look that the historical readings from a particular device, or even create a trend analysis to track the changes in temperature over time.
